MAREDI SPEEL MANYAMA

Software Developer • Full-Stack • QA Automation

Midrand, South Africa • 072 074 6800

kmanyama009@gmail.com | maredimanyama.co.za | github.com/KamzaManyama | linkedin.com/in/maredi-manyama-711269281

PROFILE

Software developer building full-stack web applications with React and Node.js, and backing them with automated end-to-end tests so they keep working in production. Since August 2024 I have worked at Mphoti Consulting, a software consultancy, on client engagements for Sunbet, PantherBet and E4 Strategic covering frontend and full-stack development, SEO-related development and QA automation. Alongside client work I build and ship my own products, including RandRoute, JobSlip and MoveIn Report.

EDUCATION

Diploma in Computer Science

Tshwane University of Technology (TUT)

Graduated 7 October 2025 • NQF Level 6, 360 credits • Faculty of ICT

Coursework:

- Programming and object-oriented development
- Databases and software engineering
- Internet and mobile programming
- Information security and operating systems
- Software project and work-integrated learning

Advanced Diploma in Computer Science

Tshwane University of Technology (TUT)

In progress • 2026 • NQF Level 7

Modules:

- Data Structures and Algorithms • Software Engineering • Human Computer Interaction
- Distributed Programming • Introduction to Data Science • Theoretical Computer Science

ABOUT ME

I'm naturally curious about how things work and always looking for ways to turn ideas into something useful. I'm interested in the people behind the problems, and that shapes how I build: software that is practical, easy to use and thoughtfully put together, whether it's a website, a new idea or one of my own products.

My main tools are JavaScript, React and Node.js, and I'm expanding into mobile development, accessibility and software quality. In the long run, I want to create technology products that solve meaningful problems and make a lasting difference in South Africa and across Africa.

KEY SKILLS

- Frontend development with React, JavaScript and TypeScript
- Responsive interfaces with Tailwind CSS, Bootstrap, HTML and CSS
- Full-stack development with Node.js, Express, REST APIs, MySQL, PostgreSQL and Supabase
- Test automation with Playwright: end-to-end, regression and integration testing
- Manual testing, test case writing, and defect logging with clear reproduction steps
- Technical SEO: dynamic SEO handlers, structured data (schema markup) and metadata
- Mobile-first, installable web apps (PWAs) with PDF generation
- Git, GitHub Actions, Azure DevOps and Jira in agile, cross-functional teams

TECH STACK

Frontend

- Languages: JavaScript, TypeScript, HTML, CSS
- Frameworks & libraries: React, Redux, Tailwind CSS, Bootstrap

Backend & Databases

- Node.js, Express, REST APIs, MySQL, PostgreSQL, Supabase

Quality & Tools

- Playwright, Jest, end-to-end, regression and integration testing
- Git, GitHub Actions, Azure DevOps, Jira, CI/CD

TECHNICAL SKILLS SUMMARY

Skill area	Technologies	Applied at
Frontend Development	React, JavaScript, TypeScript, Tailwind CSS	Sunbet, PantherBet, Mphoti Consulting, JobSlip, RandRoute, MoveIn Report
Full-Stack Development	Node.js, Express, REST APIs, MySQL, Supabase	Sunbet, Mphoti Consulting, JobSlip, RandRoute
Test Automation	Playwright, JavaScript, TypeScript, CI/CD	E4 Strategic
Manual Testing & Test Cases	Functional, regression and integration testing	E4 Strategic
Technical SEO	Node.js SEO handlers, schema markup, metadata	PantherBet
Data Science (academic)	Python, machine learning (MLP), Docker	IDA117V group project

SKILLS MATRIX

Skill area	Description / responsibility	Proficiency	Tools / platforms
Frontend Engineering	Build responsive, performant interfaces from design to production	Moderate	React, TypeScript, Tailwind CSS
Full-Stack Development	Design and consume REST APIs; integrate auth, storage and databases	Intermediate	Node.js, Express, Supabase, PostgreSQL
Test Automation (QA)	Design, run and maintain automated end-to-end and regression suites	Moderate	Playwright
Manual QA & Defects	Write test cases, run functional tests, log and track defects	Moderate	Jira
Technical SEO	Page-specific metadata and structured data rendered server-side	Moderate	Node.js, schema markup
Version Control & CI/CD	Branching, code reviews and automated pipelines	Moderate	Git, GitHub Actions, Azure DevOps

WORK EXPERIENCE

Employer:	**Mphoti Consulting**
Description:	Software consultancy that places developers on client engagements. Joined as a Software Developer Intern in August 2024 and moved into a full-time role in June 2025. Currently between client engagements and contributing to Mphoti's internal projects. • Built frontend features in JavaScript, HTML5, CSS3 and React. • Debugged and tested application functionality and contributed to UI improvements. • Placed on the Sunbet, PantherBet and E4 Strategic engagements below.
Technology used:	React, JavaScript, HTML5, CSS3, MySQL, Git
Role:	Junior Software Developer (Intern Aug 2024 – May 2025)
Duration:	Aug 2024 – Present • Full-time

Client / Project:	**E4 Strategic** **(client engagement through Mphoti Consulting)**
Project description:	Manual and automated testing for the E4 Automation initiative within the Cancellation Value Stream. • Built and maintained end-to-end automation frameworks in Playwright, including tests running live against the client's dashboard. • Ran functional, regression and integration testing and wrote test cases for key workflows. • Logged defects with clear reproduction steps. • Validated business requirements with developers, business analysts and QA. • Recognised as Employee of the Month (Uyashisa Award, May 2026) for this test automation work.
Technology used:	Playwright, JavaScript, TypeScript, CI/CD
Project role:	Automation Engineer
Project duration:	Mar 2026 – Jul 2026 • Hybrid, Johannesburg

Client / Project:	**PantherBet** **(client engagement through Mphoti Consulting)**
Project description:	SEO content design and authoring for PantherBet's digital marketing, plus SEO development for the betting platform. • Keyword research, on-page SEO, and website and promotional copy. • Tracked content performance with the marketing and product teams. • Built dynamic SEO handlers in Node.js that render page-specific metadata and structured data.
Technology used:	SEO, Node.js, React, schema markup
Project role:	SEO Consultant
Project duration:	Mar 2026 – Apr 2026 • Remote, Johannesburg

Client / Project:	**Sunbet** **(client engagement through Mphoti Consulting)**
Project description:	Enterprise online casino and sports betting platform in a high-traffic environment. • Developed and maintained core gaming and betting platforms. • Built frontend and full-stack features. • Diagnosed and resolved technical issues to keep the platform stable. • Worked with cross-functional teams to deliver within business and compliance requirements.
Technology used:	React, JavaScript, Tailwind CSS, Node.js, Git
Project role:	Junior Software Developer
Project duration:	May 2025 – Feb 2026 • On-site, Johannesburg

FEATURED PROJECTS

Project	**RandRoute** **• personal product, live**
Project description	A mobile-first budgeting app that turns bank statement data into categorised spending and a clear monthly picture, without requiring live banking access. Includes a PDF upload flow, transaction categorisation review and a budgeting dashboard.
Technologies used	React, Supabase, installable web app (PWA)
Serves	People planning a realistic monthly budget from their own statements.
Link	randroute-two.vercel.app

Project	**JobSlip** **• personal product, live**
Project description	A mobile-first app for South African tradespeople to manage customers and jobs, prepare job cards, quotes and invoices with VAT and banking details, record payments, and share professional PDFs on WhatsApp.
Technologies used	React, Supabase, PDF generation, installable web app (PWA)
Serves	Tradespeople who run their business from their phone.
Link	jobslip-zeta.vercel.app

Project	**MoveIn Report** • **personal product, live**
Project description	Helps tenants document the condition of a rental room, area by area, with defect photos and a generated PDF report. Inspections stay on the device: no account required and no data uploaded.
Technologies used	React, on-device storage, PDF generation, installable web app (PWA)
Serves	Tenants protecting their deposit when moving in or out.
Link	movein-report.vercel.app

Project	**Cape Town Food Insecurity Screening** • **academic group project, live**
Project description	A screening tool for IDA117V (Introduction to Data Science) that estimates whether a Cape Town household is at risk of adult hunger, trained on the City of Cape Town Household Survey 2024. Includes a 9-question quick screen, CSV batch scoring and a lookup across 162 suburbs, running a tuned MLP model that finds 84% of at-risk households on the test set (ROC-AUC 0.848).
Technologies used	Python, machine learning (MLP), Docker
Serves	Outreach teams prioritising households and areas for support.
Link	ida117v-screening.onrender.com (free hosting: first load can take up to a minute)

Project	**Inkwazi Digital** • **client website, live**
Project description	A redesigned website for a business compliance consultancy and digital solutions provider in KwaMhlanga, with a clear service overview of its CIPC, SARS, labour and Central Supplier Database support, a project showcase and direct contact options.
Technologies used	HTML, CSS, JavaScript
Serves	Entrepreneurs and business owners needing compliance support.
Link	inkwazidigital.co.za

Project	**TC Van de Merwe** • **concept website**
Project description	A concept website for a trucking and logistics company, presenting fleet services and freight booking options, structured to shorten a client's decision path.
Technologies used	HTML, Tailwind CSS, JavaScript
Serves	Logistics clients and businesses needing transport and delivery services.
Link	tc-van-de-merwe.vercel.app

Other projects

- **Invoice Ingest:** full-stack system that ingests supplier invoices from CSV, validates South African VAT rules, removes duplicates, stores data in MySQL and sends Gmail alerts after each run (HTML, Tailwind CSS, Node.js, Express, MySQL).
- **AA Business Consultants:** responsive ISO consultancy website (HTML, Tailwind CSS, JavaScript).
- **JW Saints College:** responsive school website for students, parents and staff (HTML, Tailwind CSS, JavaScript).

AWARDS & HIGHLIGHTS

Date	Highlight	Details
22 May 2026	Uyashisa Award – Employee of the Month	Recognised for the manual testing, test automation and test case writing delivered for E4 Strategic.
2026	AWS Summit Johannesburg	Attended at the Gallagher Convention Centre, Midrand, focusing on cloud and AI.
7 Oct 2025	Graduation	Diploma in Computer Science, Tshwane University of Technology.
1 Aug 2025	Workplace hackathon	Team hackathon focused on streamlining workflows and finishing client work.
1–3 Sep 2023	Winner – 5th Annual Tshwane Varsity Hackathon	Lead developer on the winning team. Came up with eHealth's core idea: an online clinic management system that triages patients by severity into red, green and black categories. Hosted by TUT's Faculty of ICT with the City of Tshwane and AWS.

CERTIFICATIONS & CONTINUOUS LEARNING

- Diploma in Computer Science, Tshwane University of Technology (TUT)
- Advanced Diploma in Computer Science, TUT (in progress, 2026)
- Playwright end-to-end testing (in-role training and practice)
- Technical SEO best practices (Google Search Central)
- Currently extending skills into React Native, accessibility and performance testing
